eTwinning project

WHERE WE ARE IN THE WORLD

Anno scolastico 2019-2020 Classe II C

About the project

This is an information exchange project. The aims of the project is to connect schools around the world together, so that students can experience and learn about life in different places and broaden their global knowledge and English language abilities. The project is structured by monthly themes, for which students can teach and learn about, ask and answer questions about, or share and collaborate materials and ideas relating to them. The project will adapt to the needs and expectations of the participating schools and students, developing through the types of media that we choose. Our monthly themes will be: food, celebrations, music, natural places, urban places and legends.

Si tratta di un progetto basato su uno scambio di informazioni che permetterà agli studenti di approfondire le conoscenze su altri Paesi europei e migliorare il loro Inglese. Il progetto è strutturato in tematiche mensili che daranno loro l'opportunità di apprendere ed insegnare attraverso la condivisione di idee e materiali sui quali dare e chiedere spiegazioni.

Countries involved

Italy, Spain, Albania, Portugal, Turkey, France, Romania and Poland.

Aims

We hope students will gain general skills such as the ability to research, organise and present information, and the ability to express opinions and observations about information that they have received. But more fundamentally, we hope students will develop their English language abilities. We hope students adopt new vocabulary and literacy skills, and reinforce their own correct-usage of English.

Scopo del progetto

Migliorare le conoscenze degli alunni attraverso la ricerca, l'organizzazione e la presentazione del materiale. Stimolare i ragazzi ad esprimere opinioni e osservazioni sulle informazioni ricevute attraverso l'uso corretto della lingua Inglese. Arricchire il loro vocabolario.

Work process

The project will start in October. Every month there will be a theme. Partner schools will ideally share something about their country every month that is prepared by their students and related to the themes that we have chosen. Partners should also discuss ideas and help direct the project so that their students will get the most they can out of the project.

Metodologia

I ragazzi lavoreranno in gruppi transnazionali su tematiche condivise discutendo su di esse attraverso questionari o meeting online.

Expected results.

To learn about life in different places, broaden the global knowledge of students improving their English language abilities.

Risultati attesi

Approfondire, migliorare o potenziare le conoscenze e l'uso della lingua Inglese.
